**Key Business Ratio 1980’s ~**

The D&B Industry Norms and Key Business Ratios are made possible through over one million financial statements in the D&B Financial Information Base. This file consists of U.S. corporations, partnerships and proprietorships both public and privately owned, in all size
ranges, and includes over 800 different lines of business as defined by the U.S. Standard Industrial Classification (SIC) code numbers. The data is collected weekly, maintained daily, and constantly edited and updated.

The Industry Norms are published separately in the following five major industry segments: agriculture, mining, construction/transportation/communications/utilities, manufacturing, wholesaling, retailing, finance/real estate/services.”

Million Dollar Directory 1959 ~

“Dating back to 1959, the D&B Million Dollar Directory (MDDI) provides a valuable source of information and privately held and public companies and their executives. MDDI features easy-to-use cross references, primary and secondary lines of business and the names and titles of company officers and directors. These directories provide in-depth information on 160,000 leading public and privately held U.S. companies. Covers all U.S. companies with: $9 Million or more in sales or 180 or more employees or branches with 900 or more employees.”
